Josh Gregory
Software Engineer

Top Skilled Languages

C++	Google Apps Scripts
C#	HTML
CSHTML	Java
CSS	JavaScript
	SQL

Software Proficiencies

Android Studio	Google Cloud Platform
ASP.NET Core	Linux Command Line
Azure	Oracle VM VirtualBox
Entity Framework	Ubuntu
GitHub	Visual Studio
	Windows Server

Core Attributes

Adapts to Current & Legacy Systems
Complex Problem-Solving
Data Analytics Skills
Detail-Oriented
Project Management
Strong Software Development Skills
Teamwork
Time Management/Organizational Skills
Verbal/Written Communication

Awards

UMKC Academic Dean's List

President's Education Award Program for Outstanding Academic Excellence

Key Award (Highest Achievement Award for Leadership & Community Service in 4-H)

Extracurricular and Community Service

Upsilon Pi Epsilon – International Honor Society for Computing and Information Disciplines, 2016 – 2018

Volunteer tutoring – computing and engineering undergraduates twice a week, 2017

4-H, 2002-2013

Organized and taught workshops – in programming, robotics, GPS, GIS, and astronomy

Rebuilt and reprogrammed computers to donate to those in need

Objective

To work in a creative and challenging environment that will hone my skills and help me grow as a professional.

About Me

Accomplished Full-Stack Software Engineer knowledgeable in developing practical and time-saving software solutions. Extensive experience in the full lifecycle of the software design process, including cloud-based software services and solutions, proof of concept, prototyping, integration, and maintenance. Demonstrated proficiency in leading and mentoring individuals to maximize productivity. Adept at identifying issues with existing software and creating innovative new software programs. Committed to delivering cost-effective, timely results and successful working in both team and self-directed settings.

Education

University of Missouri, Kansas City
BS Computer Science (cum laude) 2018

Shawnee Mission Northwest
HS Diploma (Honor Role) 2015

Experience

Adepto Medical | Kansas City, MO | 2017-current
Software Engineer / Director of Information Technology

This was a startup that I helped propel from a 15 person to a 60+ person company with several locations across the US. I focused on finding ways to use technology to increase efficiency and drive scalability. I was the lead developer on a team that created a software system to automate and unify ordering, billing, and servicing into one solution. I administered 50+ specialized biomed workstations, an enterprise network set up, and G Suite.

- Developed a full-stack software solution using ASP.NET Core 2.2 hosted on Azure that enhanced scalability, reduced data entry time, and eliminated most human error.
- Developed Android applications for the company using Android Studios
- Upgraded and helped facilitate seamless transition of existing IT infrastructure to new facility.
- Built and maintained Ubuntu servers to host virtual machines for people accessing on-premise databases while off-site
